

## **GRETA and the EXTINCTION REBELLION**

The environmentalist Greta Thunberg and the Extinction Rebellion protests are currently touching all our lives. Although Greta is not a founding member of the Extinction Rebellion, the above 'Relationship Chart' illustrates how well they could potentially work together.

The Extinction Rebellion (ER) was founded on 31/10/2018 by Roger Hallam and Gail Bradbrook who were born 04/05/66 and 30/04/72 respectively. Greta's date of birth (DoB) was 03/01/2003.

The starting point for the ER is 31/ 4 energy, which in terms of Numerology represents a spiritual warrior with a relentless determination to speak and act for those who have no voice, wanting to build something solid based on beliefs. Greta 's starting point can also be seen as 31/ 4 energy (from the 03/ 01 in her DoB) and founder Roger's mission (31/ 13/ 4) is about rebirth and the transformation (13/ 4) that could result from the actions of a spiritual warrior (31/ 4).

The ER and Greta's gifts (10/ 1 & 1 respectively) indicate a level of independence, and the courage to stand alone. Those with this gift often act as pioneers, taking us all into new territory. The 1 can be considered a naïve energy, however it carries the inspiration, the idea and the will to act. The 10/ 1 energy has completed the journey from 1-9, so is reborn out of a cycle of many experiences. This represents a natural leader, potentially with more confidence, who is attracted to danger and challenge.

For Gail, her challenge (19/ 10/ 1) is about the correct use of power. This can mean it is a struggle for her to be independent and self-confident, as she may feel pulled in different directions. The 1 wants to focus on the self and the 9 wants to focus on helping humanity, especially as the enormity of what needs to be achieved becomes apparent. Gail's Gift (4) is that she can also be very practical and grounded, so eventually 19/ 10/1 can bring the potential for Gail to be a 'new age leader' who takes everyone with her. As we come to the end of the year 2019 (and the end of karmic years) we may witness and share the tension between the 1 and the 9. The 19th card in Tarot is 'The Sun' and illustrates the correct use of power, as nothing remains hidden from the Sun.

As with Gail, the tension between the 1 and 9 also features in the ER and Greta's numbers. Greta's mission is a 9 and her gift is a 1, she is also an 'Old Soul', which means that she is here in service. The ER's "Overall Self Expression No." (OSE - the sum of all the letters of their name, representing what they bring with them and what the world sees) is 99/ 18/ 9, this comprises of the sum of the Soul Urge (or motivation) 54/ 9 and the Personality 45/ 9. Their gift is also a 10/ 1.

The 9 energy can potentially mean a great deal of knowledge, as it is the job of the 9 to extract the wisdom from all that has gone before, to give this back to humanity in service and/or teaching. The ER's soul urge or motivation (54/ 9) can represent a new structure (4), born of change (the 50/ 5). ER's personality (45/ 9) can represent the higher mind or new thinking (5) coming into the existing structure (40/ 4). This 45/ 9 also features in Greta's DoB, as her First Goal (3+1) = 4 and her challenge (2+3) = 5. Roger's starting point can also be seen as 45/ 9 energy (from the 04/ 05 in his DoB).

In Numerology the 45/ 9 is often referred to as the teacher and 99/ 18/ 9 can represent 'the teacher of the teachers'. The combination 99/ 18/ 9 (the ER's OSE) can represent the feeling that you know everything, but will have to learn humility. The 18/ 9 can represent holding on too tightly to a structure that has gone, as the 9 represents the end of a cycle. A massive re-evaluation, with a great deal of resistance (8), may be required before a new beginning (1) can be generated.

Last year was 2018 (includes 18/ 9) and the 18<sup>th</sup> card in Tarot is 'The Moon' with its shadows, the positive moon of the future and the negative moon of the past. The card illustrates digesting the past so the new future can emerge, ideally through the correct use of power and with everything recycled.

The mission that comes from the date the ER was founded ( $31+10+2+0+1+8= 52/ 7$ ) is ultimately very spiritual and can represent the higher 2 of love wisdom, born of massive change ( $50/ 5$ ). There can be deep sensitivity here as well as compassion. Roger's Personality No. is also  $52/ 7$ .

We can see from the 'Relationship Chart' above that the ER has the potential to complete its task, to inspire us all to think in new ways with regard to our survival. A complete shape is generated on the chart by connecting the 1 of survival with the 2 of sensitivity and emotion, making these aspects central.

The ER can be a meticulous observer, who then challenges the accepted norm to bring in new thinking. The ER's 2 comes from the year in which it was founded ( $2+0+1+8 = 11/ 2$ ), resulting in an  $11/ 2$  challenge.  $11/ 2$  can be seen as a channel, bringing down a fiery energy and wanting to inspire many to think in new ways. This can also bring instability and emotion, as the  $11/ 2$  indicates the need to learn to 'live and let live'.

Greta has 11 5's in the name on her Birth Certificate, making her extremely versatile and resourceful, so much so that her unusual or unconventional approach can mean that she calls attention to herself. This attention may be challenging, as the freedom to do things her own way is also very important to her. The 'Relationship Chart' illustrates how central to Greta's world is her focus on survival and her challenge of freedom.

Both Greta and Gail have a 3 starting point, making them creative, imaginative and great communicators.

Greta's OSE ( $13/ 4$ ) represents rebirth and transformation. The creativity (3) in the  $13/ 4$  is pushing against the unstoppable generator represented by the 1 and the existing structure represented by 4. Great creativity and new thinking can mean she must initiate the transition from stable to unstable in order to transform an existing structure (4).

Gail's mission ( $53/ 17/ 8$ ) is also about great creativity (3) born of massive change (50) and can represent someone fighting authority to bring about change. The  $17/ 8$  can represent great spirituality (7), someone who seeks the truth in order to get to the bottom of things, followed by the 8 which represents a massive re-evaluation. Gail's Soul Urge (or motivation)  $38/ 11/ 2$  represents her potential break-through as a result of this re-evaluation.

Gail's OSE ( $89/ 17/ 8$ ) represents her being pushed into blind experience to reveal some level of universal truth. The 8 in Numerology represents constant movement and potential balance after re-evaluation, as spirit flows into matter, changing patterns that would otherwise go on forever. 8 can represent the shape of karma, as above, so below.

Gail also has a 4 for her gift, this makes her very practical and potentially a great organiser. Gail's first goal ( $30 + 4 = 34/ 7$ ) is to provide a structure for spirit and new knowledge, something that may prove key for the ER.

We can see from the 'Relationship Chart' how Greta has the ability to expand Gail's world into freedom, encouraging her to embrace change. Greta and Gail's names both start with G (a 7 in numerology), which can mean they are both naturally quite reserved and may potentially work best on their own. Greta and Gail may both have keen minds, given to thought and meditation, however

with the 7 they may also be quite oblivious to others thoughts as their priority is to remain true to themselves at the deepest level.

Greta's 'Soul Urge' (or motivation) 61/ 7 represents a devotion to the cause, whereas Gail's 'Personality No.' (51/ 6) represents the sword of truth, encouraging Gail to be devoted to seeking out the truth and communicate it; both may be pushed out of their comfort zones as a result of this devotion. The 'Relationship Chart' illustrates how together they create a structure for communication and ultimately both embrace change to help all of humanity.

Roger's Gift is a 5, which helps towards this goal. The 5 encourages him to embrace change and new thinking. His starting point and mission are both 4s which means he can be very grounded and practical in his approach to achieving this goal. With Greta, the ER, Roger and Gail working together a new structure is seen to emerge on the 'Relationship Chart', this connects the existing structure with change and further links Greta and Gail's great creativity with freedom and change.

The ER has the ability to connect survival (1) and new thinking (11/ 2) in us all, but it needs others to make the connection between new knowledge (7) and the practical or existing structures (4). By bringing in new structures for creativity and change, with survival as the central focus, Greta and the ER can bring us closer to the discovery of new knowledge.

The chart finally shows us how the ER, Roger and Gail help Greta communicate her ideas and make them become a reality in a physical sense. Greta, the ER and Gail are all great planners and organisers, providing the structure required for the creativity and communication to bring about the change they seek. They have the required will power and focus, the ability to concentrate on something to the exclusion of everything else, as well as the courage and fortitude to succeed against the odds.

But, creativity and new thinking are urgently required by all, not just a few.

Technology enables us all to communicate and collaborate more easily, for our voices to be heard and understood by those in power.

Change is the one certainty in this world, and change can be good...
