Do the numbers in your life add up?

How your Numerology consultation works

Your date of birth and the name on your Birth Certificate produce a set of numbers that show your unique mission.

Numerology looks at the 'stuff' you carry around with you and allows you to see what may appear to be a problem in a whole new light. What appears to be negative may, potentially, be very positive.

You'll gain clarity about what is really going on, what the universe wants you to do, the reason certain people may be in your world and why situations repeat themselves.

After your consultation you will receive:

- A recording of your consultation
- Your **Life Map** showing your journey to date and beyond (ages 0-99, like a detailed weather forecast for your life).
- Your **Relationship Chart**(s) to help you understand the connections you share with the people in your world and the impact of significant events.

Why should I choose Numerology to guide me?

We all have free will and Numerology provides an opportunity to look objectively at the energies and cycles that are at work in your life.

Numerology is non-judgemental and allows you to make informed decisions, based on a much bigger picture, rather than from fear or from a feeling of being under pressure.

Gaining an understanding of what you have been put on this planet to do puts you in the driving seat and in a position to choose what is right for you.

Gain clarity and vision about your life

Everyone has a unique set of circumstances and Numerology takes a scientific approach to the numbers and letters that are unique to you.

The natural cycles and trends within your life can be identified and worked with to empower you to make the most of your potential. Numerology can bring great clarity and vision to all areas of your life:

- Relationships
- Careers
- Business opportunities.

Numerology can guide you with regard to issues such as:

- The impact of changing your name
- The impact of new people in your world
- How to change patterns that might otherwise repeat forever.

Numerology is an ancient science that can:

- Help you to understand your journey to date and where to go from here
- Reveal why your relationships work - and why they don't
- Help you to live your life's mission.

Understanding your personal Numerology chart can be very empowering. You'll have a clear idea of where you're going and know how to unleash your potential, have better relationships and live your life feeling more in tune with the world.

How much is a consultation?

You only need to have your numbers done once - so have them done professionally!

A **full consultation** lasts at least three hours and is about your whole journey, starting with the unique set of circumstances you were born into and includes key relationships along the way. The fee for this is **just £500**.

A **standard consultation** lasts at least two hours and focuses on your most important relationship(s) i.e. your partner and children. The fee is **only £300** for this.

The **Just about me** consultation lasts at least an hour and focuses on you, your life map and the impact of significant dates and costs **only £150**.

Numerology parties

It's fun to do this with others, to understand the connections you share and what can be achieved together. Each person will have a mini-reading and a Relationship Chart completed. I will also create a Relationship Chart to show how everyone at the party is connected. You can have a recording of your individual reading. The fee is **only £50 per person** (minimum of 4).

Will I need to travel far?

Ideally your consultation will be face-to-face, but it can be online by video link or phone.

Jane is based in Kent, so there may be additional travel costs if you require a personal visit.
